

I'm writing this note in order to strongly urge that the no call laws for the state of Wisconsin be left intact and not altered to match federal guidelines.

I currently have my private home line on our state's no call list and I still seem to get solicitation calls which are very annoying. I've recently added a home office business line in my home which was not registered on our state's no call listing. I get an average of 3-4 calls/week on that line which is very irritating and a waste of time. Please do not change our Wisconsin no call laws.
